**Subject:** RE: Comment Period for South Redmond Draft Land Use and Management Plan ends on Friday, Dec. 7, at 5 PM (UNCLASSIFIED)

Classification: UNCLASSIFIED

Caveats: NONE

Gerry,

The Oregon Military Department continues to support Concept D of the Management Plan and we wish to remain as collaborative partners as the details of the plans are refined. Of specific interest to us is resolution of some of the issues associated with the proposed alignment of US Highway 97 and what impacts this alignment may have on the National Guard's ability to conduct training in the future. Similarly, we are interested in the proposed alignment of the Pronghorn Secondary Access. As this plan does not appear to address the specific siting of such alignments in great detail, we wish to remain as stakeholders as these plans are further developed. It is our desire to maintain safe transportation corridors for military traffic to access the military training lands to the east of the South Redmond Tract.

Thank you for your consideration of these comments as a part of the public comment process.
