Subject: re: surprised

After the strong opposition from the City of Redmond, Deschutes County and others I was very surprised that you presented any options at all with housing in that area. To protect not the just airport from future litigation over noise issues with potential home owners in the future when the third runway is constructed, but to also protect the owners of those homes I would strongly suggest that whatever choice is made that it NOT include any housing. Airports all over the country are paying homeowners over noise issues even though the airports were clearly their first and the homeowners were told about potential noise issues prior to purchasing or constructing homes in those areas. I don't want the City of Redmond and Redmond Airport placed in that position unless DSL can guarantee that they would be responsible for paying the future attorney fees and all costs that the City/Airport incur based on their decision. It is unfair to place us in that position when it could be eliminated by choosing options that do not including any housing.

Carrie Novick, Redmond Airport Manager
